ABOUT ME

Hello there! My name is Polina Hirbu and I am a Multimedia Integration student at Vanier College. I like stepping out of the ordinary, which is reflected in my design.

I value originality, innovation and storytelling. My goal would be to bring complex, creative ideas to life.

PERSONAL BRANDING

Fall 2025

PROJECT

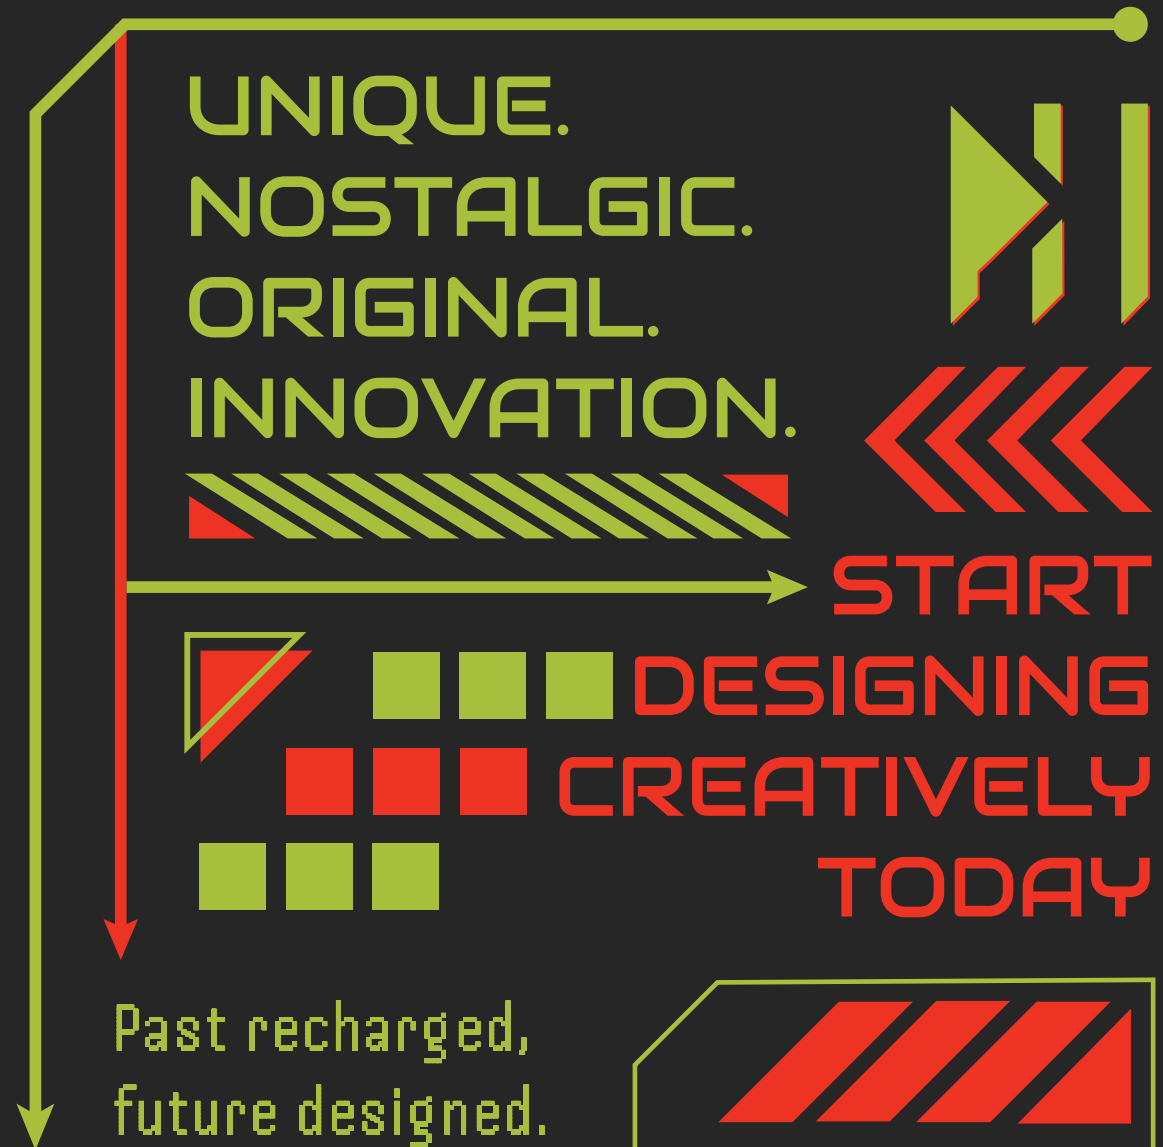

My personal brand, as a designer

CHALLENGE

My goal was to create something unique, that represents me in different ways (print, social media posts, animation, etc.)

SOLUTION

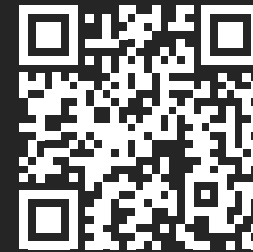

I chose visual storytelling over anything. I pushed boundaries and did more rather than less.

PERSONAL BRANDING - STYLESCAPE

POLINA HIRBU

DESIGN IN A WAY THAT IS UNIQUE,
INNOVATIVE AND ORIGINAL.

Design in the cyber-retro realm fuses **nostalgia with innovation** – neon grids meet sleek minimalism, and glitch aesthetics merge with precision-engineered form. It's a rebellion against the ordinary.

Each curve, light trail, and digital texture feels alive – a reminder that creativity can transcend time, bending yesterday's dreams into tomorrow's design language.

Past recharged, future designed.

YEARBOOK SPREAD

January 2026

PROJECT

Sample yearbook spread for the 2026 graduating students.

CHALLENGE

Create a brand guide for a student yearbook using a mix of ideas from three teammates.

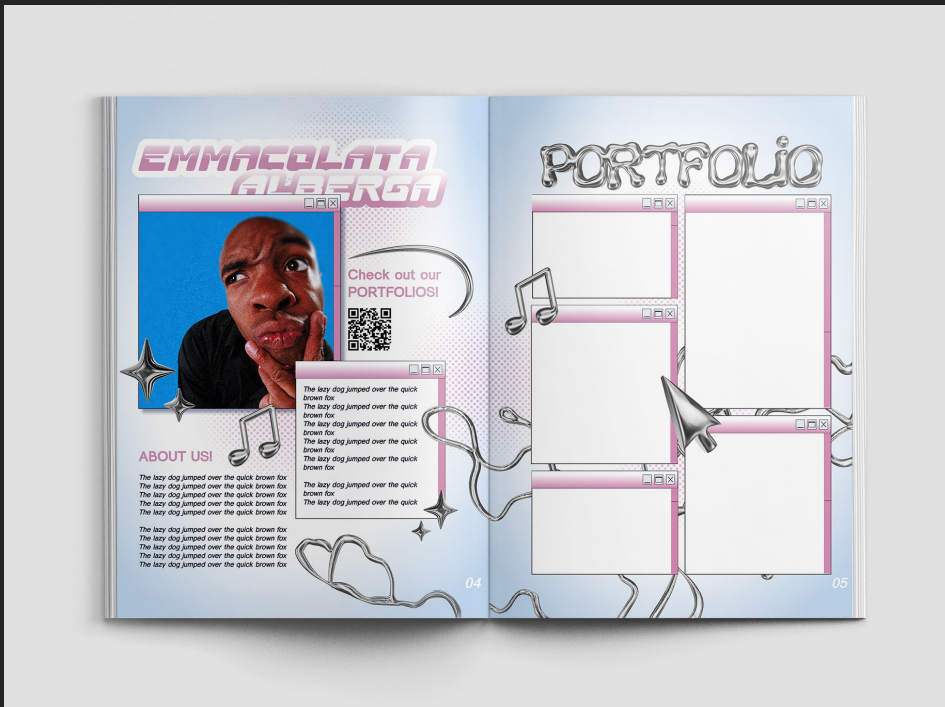

I was in charge of the yearbook spread and graphic elements.

SOLUTION

With thorough brainstorming and research, I was able to recreate a nostalgic feeling of the cyber era of the 2000's.

The spread then ended up winning and was chosen as the yearbook.

VERNISSAGE EVENT

Date

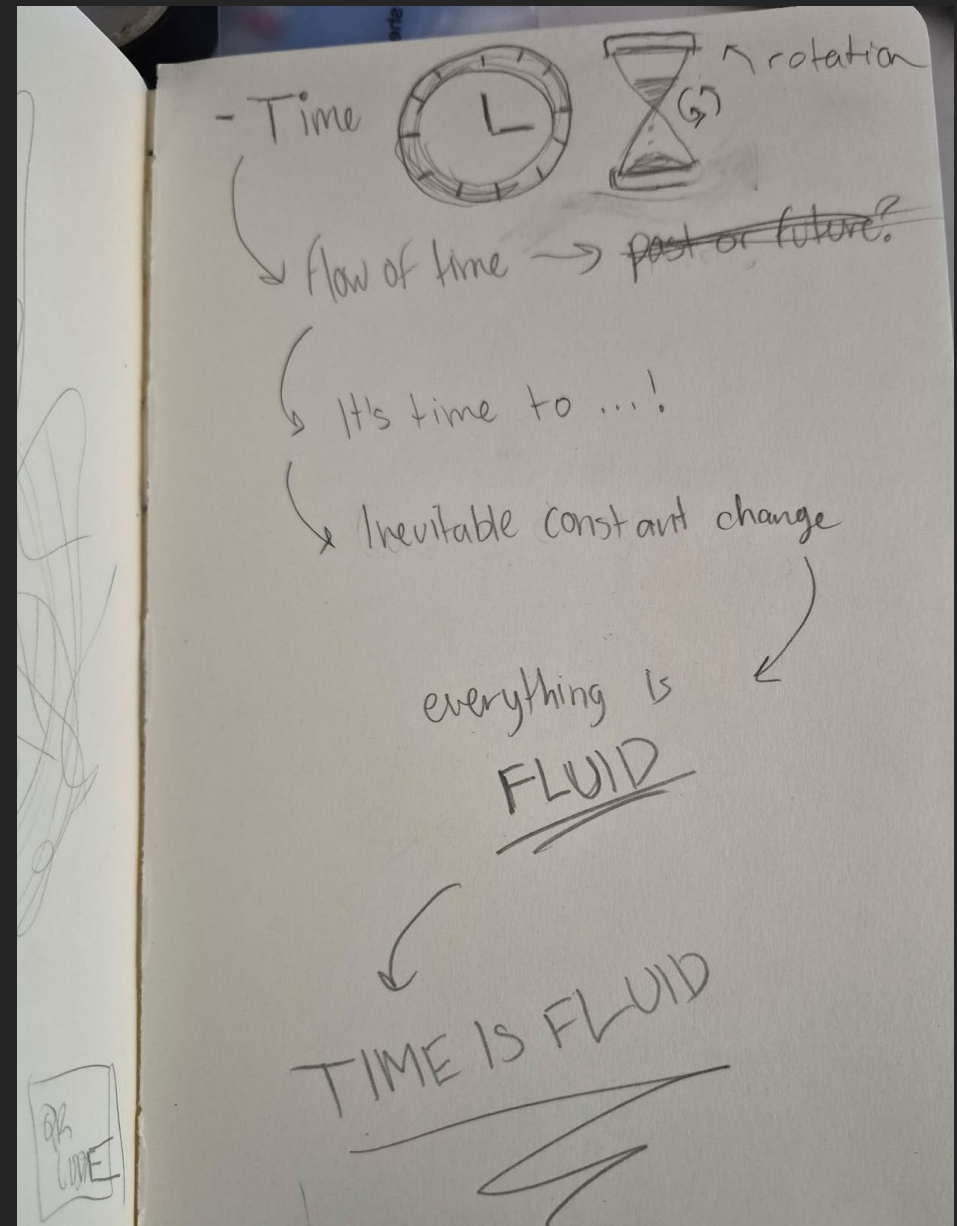

PROJECT

Vernissage 2026 event proposal.
Poster, Web screen saver,
Sticker, Invitation, Button,
and Badge.

CHALLENGE

Create 6 items using a phrase
related to movement. Mine was
"Time is fluid".

SOLUTION

VANIER ECE

Summer 2025

PROJECT

Client work for Vanier ECE promotion videos

CHALLENGE

My colleague and I were tasked to film, compose, and edit 2 videos for 2 of Vanier's ECE courses.

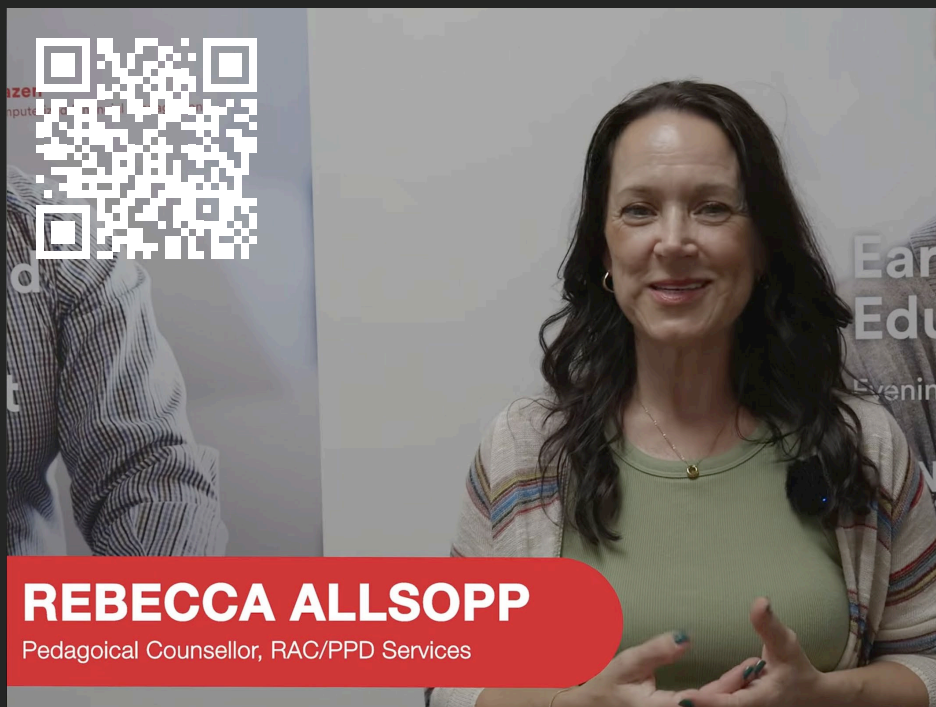

SOLUTION

I was in charge of making animations, filming, and sending the final videos. I assured that the pacing is fast and dynamic, to capture attention.

ZOOVRAC & BRANDY'S

Oct-Dec 2025

PROJECT

Flyers, logo and website for a local pet salon recently rebranded as ZOOVRAC & BRANDY'S

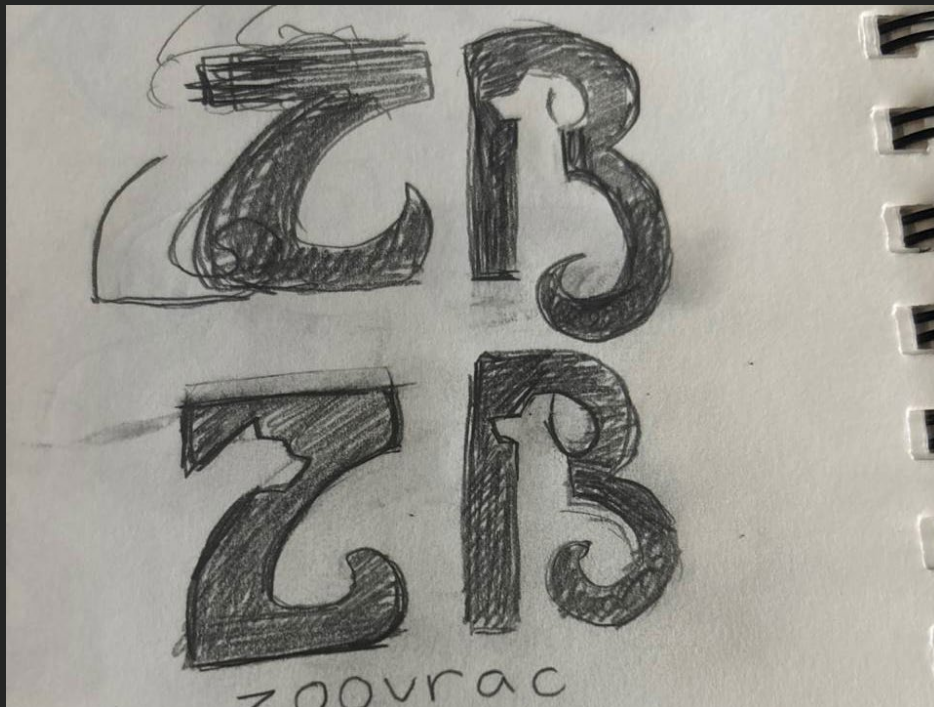

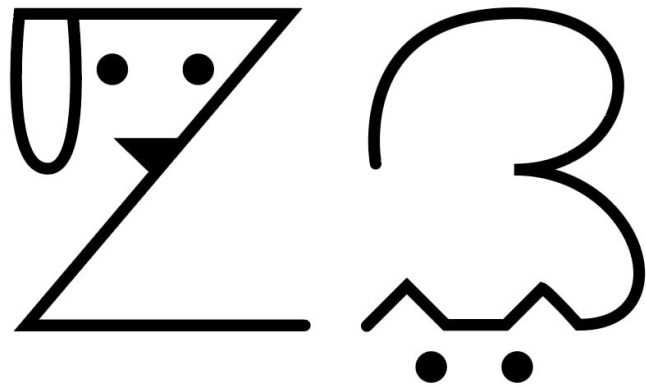

CHALLENGE

I was tasked to design three types of media using the colors they provided to give a professional and clean look.

SOLUTION

I used proper communication with the client to understand their needs and used my skills to bring what they desire.

CAN DESIGN

Winter 2024

PROJECT

The goal was to create a can design using only analog elements (such as printing, hand-drawn, etc.) and make it into a collage using Photoshop and Bitmap.

For the mockup, I have used blender to set up the scene and the lights to showcase the design.

CHALLENGE

It took me a bit to get the perfect shape to scan because it kept looking wrong. I also learned to use bitmap for the first time.

SOLUTION

I applied noise for a retro style and lots of layering. So, despite having little experience with this, I managed to make it look balanced.

VERNISSAGE WEBSITE

April 2025

PROJECT

Vernissage 2025 for the graduating students of Micromedia 412

CHALLENGE

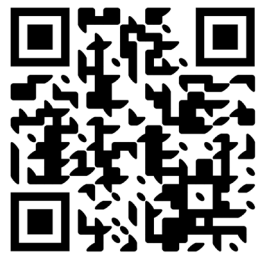

I collaborated with third year students and our web teacher bring their figma design to life to showcase their portfolios.

SOLUTION

Using the figma layout provided by the 3rd years, I manually placed most elements provided (especially items like the moving banners and the images).

Then I used vue to loop the tvs as well as the names of the students.

Later our teacher had the photos and could place them in the tvs.

SCAN ME

TITLE SEQUENCE

November 2025

PROJECT

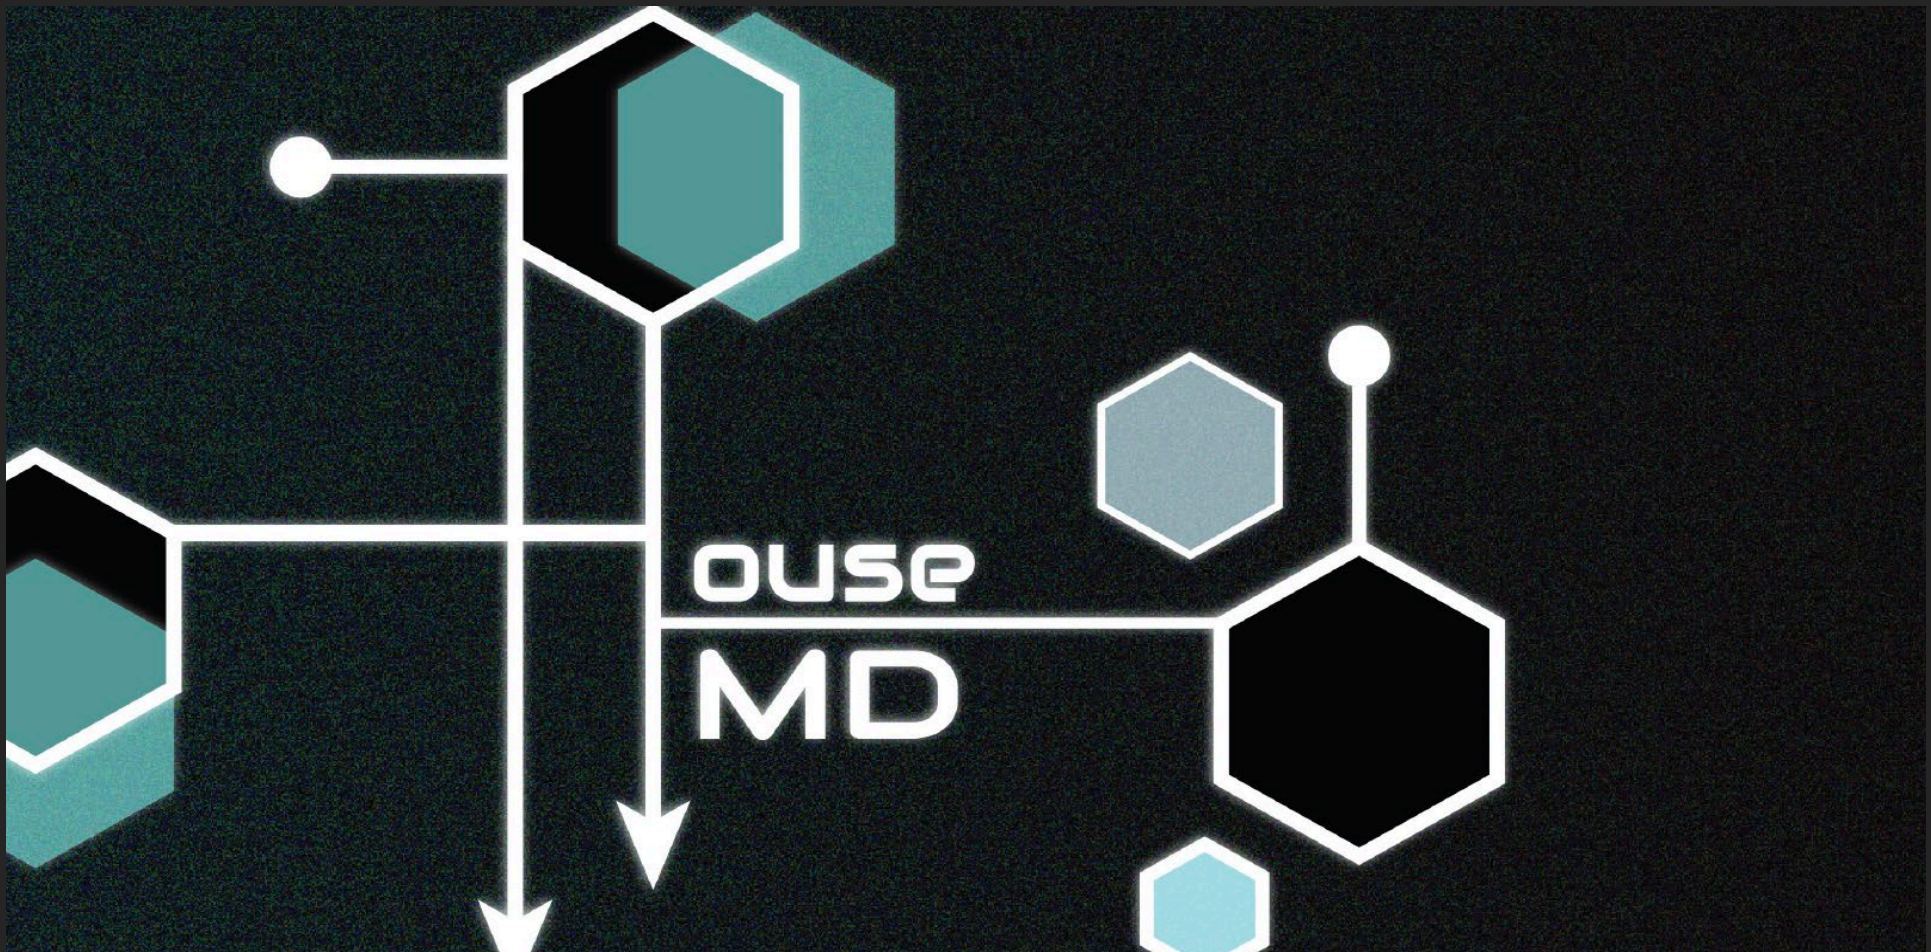

House M.D. title sequence animation

CHALLENGE

Create a title seuquence for a movie/show, with a logo.

SOLUTION

I decided to make a mysterious opening to the show to match its intense buildup each episode introduction.

Jennifer Morrison

CAPYTHON CASE STUDY

March 2025

PROJECT

Web case study on our Capython project using Vue.js.

CHALLENGE

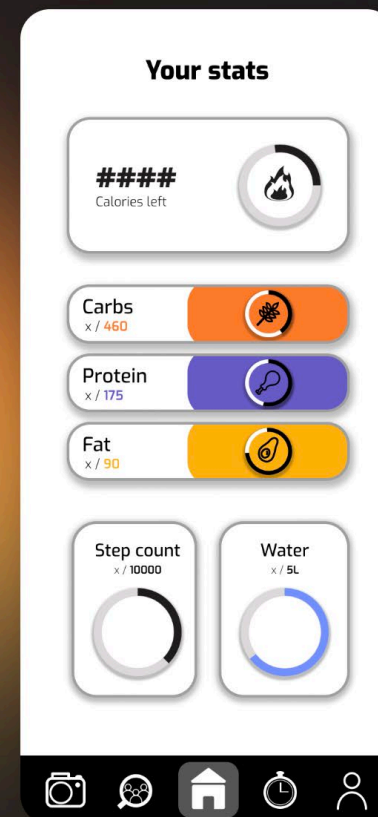

Analysing and showcasing the process of making the Capython project.

SOLUTION

I used dynamic animations, index sorting and experimented with layout to make the website fun and engaging.

SISU YOUR HOMEPAGE

As you open your app, the user will be greeted by their stats including the calories, carbs, protein and fat you've consumed throughout their day. At the bottom, the user will also see the amount of steps and water intake. This allows easy tracking for the user to simplify their diet journey.

WEBSITE!**

PSA CAMPAIGN

Winter 2023

PROJECT

A print campaign about gambling addiction.

CHALLENGE

My task was to showcase the same issue using different formatting and wording to advertise my campaign.

SOLUTION

I used dramatic, alarming colors to emphasize the seriousness of gambling issues, from different points of view.

Polina Hirbu

...

When a person has a gambling problem,^{1/3} it often impacts **six other people**
